HEAVY EQUIPMENT REPAIR & SUPPORT

When it comes to heavy equipment repair and the support that it takes to keep our customers up, running, and making money, our team is the best in the business. Our company has over 30 years of experience supporting customers in the field at our 18 service facilities around the country.

FULLY-CAPABLE SERVICE TEAM AND FACILITIES

Our growth and acquisitions of new companies, throughout the NED multi-state footprint, continue to benefit our service capabilities. Today, NED is proud to employ over 125 experienced field and shop mechanics, who are supported by a huge fleet of over 100 new service and repair vehicles, 95 service bays, and several full fabrication shops.

COMPONENT REBUILD CAPABILITIES

With overhead cranes at many of our shops, talented welders, fabrication equipment, and seasoned mechanics, we can do just about anything. Our service technicians can perform repairs or replacements of critical components, including final drives, transmissions, tracks, idler rollers, undercarriage components, pins, bushings, and more.

Our technicians are factory trained and we are proud to be certified to perform light engine repair on engines from several key engine manufacturers, including Cummins, Scania, and Yanmar.

FAST PARTS SOLUTIONS

Our parts team is focused on providing quick and economical parts solutions to our customers. We do this by stocking hundreds of thousands of dollars of parts across all of our branches and through strong relationships with our suppliers, who also stock millions of parts in inventory.
